Sampling Statistics: SSDS' sampling technique assures that the number of REIT facilities in each market's sample represents the approximate percentage of actual REIT facilities in that given market. In this quarter report, data was obtained from 2,628 facilities owned by the four REITs and 7,747 facilities privately owned. Thus, the percentage of REIT facilities included in this quarter's sample is a reasonable proportion to their market share in these top 50 markets.
